Frontend development plan

A client-friendly view of the technologies, pages and functions planned for Thai Medical Desk.

How to read this plan

Route means the page address. Each page below lists what it shows and what users can do. Patient pages share the same case ID so related records stay connected.

Technology stack

Area	Technology
Template	vite_tanstack
Framework	React + TypeScript + Vite
Styling and UI	Tailwind CSS + shadcn/ui (Base UI)
Icons	Lucide React
Routing	TanStack Router
Server data	TanStack Query
API handling	Axios
Forms and validation	TanStack Form + Zod
Tables	TanStack Table
UI state	React state + Context
Excel export	SheetJS (xlsx)
Code quality	TypeScript + ESLint + Prettier

Plan navigation: daily workspace, patient services, partner network, finance and administration, and patient/agent access.

Daily workspace

The pages staff use to find patients, manage cases and organise daily work.

In /patients/:caseId, :caseId is replaced by the patient's actual case ID.

Dashboard

`/`

WHAT THE PAGE SHOWS

Active cases, stage counts, follow-ups, appointments, financial summaries and recent activity

WHAT USERS CAN DO

Create/open cases, search/filter, complete/reopen tasks, switch currency and open calendar

Login page

`/login`

WHAT THE PAGE SHOWS

Email and password fields

WHAT USERS CAN DO

Sign in with email and password; sign out

Patient cases

`/workspace/patients`

WHAT THE PAGE SHOWS

Patient names, case IDs, contacts, hospitals, stages, sources, coordinators and office

WHAT USERS CAN DO

Create cases, search/filter/sort, check duplicates, open cases and export CSV/Excel

Patient workspace

`/patients/:caseId`

WHAT THE PAGE SHOWS

Case header and eight tabs: Overview, Medical records, Communication, Hospital & appointment, Visa, Thailand assistance, Follow-up tasks, Accounts & billing

WHAT USERS CAN DO

Edit details, move stages, record lost reasons, upload/view files, add notes/tasks, update appointments/travel and manage linked billing

Follow-up calendar

`/workspace/calendar`

WHAT THE PAGE SHOWS

Month/list views of tasks, appointments, arrivals and departures

WHAT USERS CAN DO

Browse dates, select Today, filter by office/Mine, add tasks, complete/reopen tasks and open cases

Patient services

Inquiry handling, visa preparation, communication, Thailand support and aftercare.

Lead & inquiry hub

`/workspace/leads`

WHAT THE PAGE SHOWS

Inquiry contacts, sources, assigned coordinators, response times, status and lost reasons

WHAT USERS CAN DO

Add/edit inquiries, create/link cases, check duplicate phones, record lost reasons and export records

Medical visa desk

`/workspace/visas`

WHAT THE PAGE SHOWS

Patient/attendant records, passports, expiry dates, checklists, submissions and visa status

WHAT USERS CAN DO

Add/edit linked records, tick document checklists, update status and flag passport expiry

Messaging & reminders

`/workspace/messages`

WHAT THE PAGE SHOWS

Bangla/English templates, recipients, message bodies, schedules and delivery status

WHAT USERS CAN DO

Compose messages, select single/group/broadcast audiences, save reminders and simulate delivery into case history

Thailand ground services

`/workspace/ground`

WHAT THE PAGE SHOWS

Patient-linked pickups, transfers, interpreters, dates/times, suppliers, locations and emergency/on-call contacts

WHAT USERS CAN DO

Add/edit bookings, assign providers, update service status and export schedules

Aftercare & feedback

`/workspace/aftercare`

WHAT THE PAGE SHOWS

Return dates, consultations, medication reminders, next visits, ratings and feedback

WHAT USERS CAN DO

Add/edit plans, create 1-week/1-month/3-month check-in tasks, record feedback and update status

Partner network

The hospitals, specialists, agents, packages and suppliers supporting each case.

Hospital directory

`/workspace/hospitals`

WHAT THE PAGE SHOWS

Departments, accreditation, location, contacts, price validity, linked packages, doctors and reply history

WHAT USERS CAN DO

Add/edit hospitals, update partner information, search/filter and export records

Doctor management

`/workspace/doctors`

WHAT THE PAGE SHOWS

Hospital, specialty, languages, clinic days, outcomes and assigned patients

WHAT USERS CAN DO

Add/edit profiles, search specialists, open linked cases and record demo second-opinion requests

Agent network

`/workspace/agents`

WHAT THE PAGE SHOWS

Contacts, districts, terms, referrals, rankings, commissions and monthly statements

WHAT USERS CAN DO

Add/edit agents, configure fixed/percentage rules and hospital/package scope, review referrals, record demo payouts and export statements

Packages & quote comparison

`/workspace/packages`

WHAT THE PAGE SHOWS

Package estimates/validity and side-by-side hospital replies with doctors and reply times

WHAT USERS CAN DO

Add/edit packages, record hospital requests/replies, select a proposal and save its quotation with financial permission

Suppliers & vendors

`/workspace/suppliers`

WHAT THE PAGE SHOWS

Vendor categories, contacts, negotiated rates, contract validity, balances and linked bookings

WHAT USERS CAN DO

Add/edit suppliers, search/filter, review currency-separated costs/payments and export records

Finance and administration

Patient accounts, business performance, staff access and company settings.

Accounts & billing

`/workspace/accounts`

WHAT THE PAGE SHOWS

Patient accounts, charges, payments, balances, supplier costs, profit and financial documents

WHAT USERS CAN DO

Select a case/currency, calculate charges and FX, save quotations, issue/lock invoices, record payments/refunds, reverse entries and print/save PDF

Reports & analytics

`/workspace/reports`

WHAT THE PAGE SHOWS

Inquiry/conversion counts, stage/source breakdowns, lost reasons, response times, workload and revenue/profit

WHAT USERS CAN DO

Select month/currency, group financial results by hospital/agent/package/staff and export Excel

Staff & permissions

`/workspace/staff`

WHAT THE PAGE SHOWS

Staff contacts, positions, offices, roles, status and permission matrix

WHAT USERS CAN DO

Add/edit/invite/approve staff, deactivate/reactivate, apply role templates/custom permissions and warn about active-case reassignment

System information & settings

`/workspace/settings`

WHAT THE PAGE SHOWS

Company contacts/address, default account currency, document footer, feature information and demo reset

WHAT USERS CAN DO

Update billing settings, review capabilities and restore demo records with confirmation

Patient and agent access

Separate pages for patient/family access, agent referrals and public inquiries.

Patient & family portal

`/patient-portal`

WHAT THE PAGE SHOWS

Own case progress, appointment, visa status, documents, billing and aftercare

WHAT USERS CAN DO

View linked information, upload permitted files, view financial documents, simulate payment and submit feedback

Agent portal

`/agent-portal`

WHAT THE PAGE SHOWS

Own referrals, patient stages, commissions and monthly statements

WHAT USERS CAN DO

Submit referrals, track linked cases, choose statement month and download statements

Public inquiry form

`/inquiry`

WHAT THE PAGE SHOWS

Patient name, phone, email, city and stated medical need

WHAT USERS CAN DO

Validate/submit inquiry, create or link a patient case and show confirmation
